SUMMARY

Software Engineering student with a strong foundation in system architecture , database management , writing scripts for task automation, technical troubleshooting ,hands on experience building full stack web apps and AI powered systems. A deep understanding of software development life cycle (SDLC) and system integration.

ACADEMICS AND CERTIFICATIONS

- O level (ZIMSEC) | Howard High School – 2021
- A level (ZIMSEC) | Excellent Tutorial Collage -2024
- **BSc (Hons) in Software Engineering** | Midlands State University (**currently studying**) -2028
- Ai developer | IBM Course – 2026
- Systems and Solutions architect | IBM Course – 2026
- Data Science and Analytics | HP life -2026
- Blockchain Basics |Great Learning -2026
- AI Literacy | ZITEC -2026

TECHNICAL SKILL S

- Python (Django , Pytorch)
- JavaScript (Node.JS , React.Js ,Express.JS , Next.js)
- React Native
- Flutter(dart)
- Kotlin
- SQL (MySql , Postgres)
- NoSQL (Mongodb)
- Git and Github
- Restfull API

- Agile Methodologies
- Microsoft Office Suite (Word , Excel, power point)
- Network trouble shooting

PROJECTS

- Developed a digital will vault platform (using **MERN** stack and **JSON Web Tokens** for authentication) for users to secure digital assets and their final wishes in case of tragedy
- Developed an **Ai** business predictive dashboard to predict the outcomes of a business in the future using **Recharts** , **Node.JS** and **Brain.js** for data analysis and prediction with 85% accuracy.
- Co-developed a peer to peer money pool savings platform (in progress) to counter conman and fraud mainly for the informal people and is also integrated with a real time ledger to track contributions with KYC verifications and include a dashboard for group transparency using **Django**
- Co-developed a lost and found platform for students with real insights database to store items using **MySQL** databases management system which is to serve the students at the instituton
- Developed an agricultural based market place using **React** , **Node.Js** , **Express.js** , **Mysql** which targets farmers to investors with real time market information and it also includes **USSD** for use in remote areas which I developed with **Node.js** and **Express.js**

OTHER SKILLS

- Excellent verbal and written communication skills
- Ability to work under pressure and in a fast paced environment
- Strong interpersonal skills and a team player attitude
- High level of confidentiality and attention

ACHIEVEMENTS

- Fourth runner up at the Xplug Innovation 2025 hackathon session at Midlands State University (Lost and found platform for students)

LANGUAGES

- English
- Shona

POSITIONS OF RESPONSIBILITY

- Member of the Google Developers Community
- Member of the Young AI Leaders Gweru Hub
